

## What We Learned In This Lesson

In life, it is important to always have **GOALS**.

**GOAL** = something you make **PLANS** to **ACHIEVE**, and **WORK** towards Achieving.

The reasons why you need to have **GOALS** are:

- a) Goals provide you with **DIRECTION** – this way, you will always know what you want and how to get it.
- b) Goals allow you to **STAY ON COURSE** – having goals allow you to **FOCUS** on what you want to achieve.
- c) Goals allow you to **MEASURE your Progress** – so that you will know if you are getting closer or further away from your Goals.

When setting goals, try to follow the **SMART** Goals:

Specific

Measurable

Achievable

Rewarding

Time-based

### Why is this important?

Kids should learn about goals because they provide direction, help track progress, and keep them focused. Setting and achieving goals builds essential skills for decision-making, motivation, and future success.
